June 13, 2006

Dear Skipper:

Attached are the preliminary results for the 2006 Spring Series, a weekend of contrasts in the weather, not unusual for an Off Soundings event. As always participants exercised their judgment regarding the conditions, wisely determining whether they wanted to race and, if so, how to race safely in the prevailing conditions, and there were no major incidents. For me that's one of the important factors in Off Soundings racing. It often provides the opportunity to test the skipper, boat, and crew in conditions that they might not otherwise encounter; including making the choice of whether to compete, and if they do determining how to sail successfully in what they find.

The Off Soundings Club does not provide results in machine readable form, nor does it provide them with the Off Soundings PE removed. The official results are those that include the PE. If you wish to calculate corrected time without PE for comparison subtract the SD from the Elapsed Time shown. The SD is the time between the start of the first Class (NS-3) and the start time of the boat that you are analyzing. This will provide the actual time spent on the course. Calculate a TCF without PE for the boat in question with this formula: $TCF = 600 / (480 + PHRF)$ using the PHRF handicap for the boat from the Entry List and multiply the elapsed time by the new TCF. That will provide the corrected time without PE.

The attached results will be audited for accuracy and the final results will be mailed with the Notice of Race for the Fall Series on July 7. If you have questions or comments regarding the preliminary results please contact me or the Scorer, Greg Gilmartin, directly.

Best regards,

Steven M. Purdy
Race Secretary
